

# PLANNED PREVENTATIVE MAINTENANCE PACKAGES

What is the cost of **not** maintaining your chemical dosing equipment?

- Equipment breakdowns = potential downtime and lost production
- Chemical spillages
- Chemical accidents = penalties and a damaged company reputation
- Dosing failures = process at risk

## Reduce the risks by using WES

Chemical dosing lies at the heart of many industrial and utility processes.

The health, suitability and reliability of your chemical dosing equipment is vital to your business operation. It is critical to safety to ensure a well-maintained chemical dosing equipment is overlooked.

## Take control of the risks - let WES take care of your chemical dosing equipment maintenance

We offer free condition surveys, technical advice and planned maintenance packages for all chemical dosing systems - irrespective of age or manufacturer

- ✓ Ensure safe operation
- ✓ Reduce leakage risks
- ✓ Save chemical and cost
- ✓ Improve reliability
- ✓ Plan for sustainability
- ✓ Increase system resilience
- ✓ Reduce unplanned downtime
- ✓ Protect the environment
- ✓ Prolong asset life

# GOLD, SILVER, BRONZE MAINTENANCE PACKAGES

WES offers a FREE initial on-site survey to:

- Audit existing equipment against current standards
- Assess the general condition of all equipment
- Advise on recommended repair or upgrade work
- Recommend a service package appropriate to the application
- Provide a fixed price quotation for that service package

## Tailor-made planned preventative maintenance

WES has developed a range of planned maintenance packages to suit your equipment, operational needs and budget. Fixed pricing, no surprises. Bespoke packages are also available for those who have specific requirements.
